

This post is to help people find the newest Pokemon game. The game is called "Pokemon Moemon Platinum". The game was created by "Nintendo" and it's for both Nintendo DS and Game Boy Advance. The game still has the same idea as the past, but you'll find new features like time, day, night cycles including weather effects. You'll also find new items that weren't in past games like berries that will heal your pokemon or make them stronger. You can even trade your pokemon with other players who have their DS systems hooked up to the internet! The website downloadmoemonplatinum.net has the newest releases for Pokemon Moemon Platinum. There's also downloadmoemon.net but it is very rarely updated. If you still can't find it, then I suggest using Google or Bing search ("Nintendo Moemon Platinum" or "downloadPokemon Moemon platinum") to find the game. Have fun playing! <http://www.downloadmoemonplatinum.net/pokemon-platinum/> [ARTICLE END] Download link: <http://www.mediafire.com/?0jpf5mw1zn97e5tq> Screenshots: http://i1385.photobucket.com/albums/ah315/KingPixilate/ScreensShot122_zps610aea4b.png
